Call for Abstracts

Crossroads Eclipse 2024 Research Workshop
Southern Illinois University Carbondale

April 5, 2024–April 8, 2024

On Monday, April 8, 2024, a total solar eclipse path will stretch across North America from Mexico to Canada. In the path of both the 2017 and 2024 total solar eclipses, Southern Illinois University Carbondale (SIUC) is hosting the second Crossroads Eclipse Research Workshop.

The Crossroads Eclipse Research Workshop has been established to facilitate and enrich research opportunities in solar science and citizen science. SIUC has established research observation areas at the SIU Farms Dark Site and the main campus that will be available to workshop participants. Participants will present their research project and are requested to submit brief abstracts for either talks and/or poster presentations. Selected presentations will be made at SIU Carbondale on Saturday, April 6, 2024 3:30-6:00 PM. Posters will additionally be displayed at the Crossroads Astronomy Science and Technology Expo to be held April 7–8, 2024 at SIU Carbondale. Successful applicants will be given access to research space for eclipse observations either on the SIUC main campus, or at the SIUC Farms Dark Site.

For full consideration, abstracts should be submitted no later than January 31, 2024 to Steve Gariepy at mammoth@siu.edu. Groups will be notified by February 7, 2024.

Space is limited. Participants will be responsible for their own travel and lodging. See https://eclipse.siu.edu/crossroads-eclipse-research-workshop/ for details.
